

# Stewart-Warner's Classic **Sidewinder** is BACK.

## Designed for performance. Chosen for speed.

The Sidewinder tachometer, part of Stewart-Warner's Deluxe Family, was once a favorite in racecars—with a shift point at the Twelve O'Clock position, between 6500 and 7000 RPM. The newly redesigned Sidewinder features superior components for an even tougher and more reliable gauge.

### FEATURES

- 0 – 8000 RPM
- 3 3/8" Diameter
- Solid State Amplified Circuitry
- Black Background, White Numerals and Pointer
- Polished Stainless Steel Bezel

The Sidewinder is backed by Stewart-Warner's 24-month warranty, and comes with a full range of accessories available.

For over 100 years, the Stewart-Warner name has set the standard for instruments in the market. From the Ford Model T speedometer, to instruments in WWII tanks, to today's Deluxe Line, Stewart-Warner has always provided performance you can count on.
